TECHNICAL SKILLS

Languages & Frameworks

C#, .NET 10 / .NET Core,
ASP.NET, Web API, Semantic
Kernel,
Microsoft.Extensions.AI,
JavaScript, TypeScript,
React, Angular, HTML/CSS

Data & Services

SQL Server, T-SQL, Stored
Procedures, Entity
Framework, Dapper, REST
APIs, Microservices

Cloud & DevOps

Azure, Azure OpenAI, Azure
DevOps, AWS, CI/CD, Git,
Docker

Practices

GitHub Copilot, Claude Code,
Claude Desktop, Claude
Projects, Artifacts,
Routines, Agentic AI,
Microsoft Agent Framework,
Unit & Integration Testing,
Clean Architecture,
Agile/Scrum, Code Reviews,
Mentorship

EDUCATION

B.S. Physics

Pennsylvania State University
Aug 2016

CERTIFICATIONS

JLPT N5

LANGUAGES

Spanish, Japanese

INTERESTS

Distance running, endurance training

PROFESSIONAL SUMMARY

Senior .NET Engineer with 10 years of experience designing and delivering enterprise applications using C#, .NET Core, ASP.NET, SQL Server, and modern JavaScript frameworks. Skilled in modernizing legacy systems, building scalable APIs, and improving performance across critical business workflows. Strong background in AI-assisted development and AI integration, including Semantic Kernel plugin development, Microsoft Agent Framework workflows, and Microsoft.Extensions.AI. Experience with GitHub Copilot, Claude Code, Claude Desktop, and agentic AI workflows. Experience integrating LLM-powered capabilities into production software and using AI tools to accelerate development, automate repetitive work, and improve maintainability. Known for clean architecture, collaborative delivery, and pragmatic problem solving in Agile environments.

EXPERIENCE

Amplifund / Euna Solutions — Cleveland, OH

Feb 2025 – Aug 2026

Developer III (Senior Developer)

- Led a development team through delivery of 8 features, driving technical direction, task breakdown, and cross-team coordination.
- Extended a large-scale grant management platform for government clients, improving accessibility, workflow customization, and release reliability.
- Optimized API interactions and database access patterns to improve performance, maintainability, and operational stability across core services.
- Leveraged Claude Desktop, Claude Code, Claude Projects, artifacts, and routines in daily development workflows to accelerate feature implementation, automate repetitive tasks, and support debugging and code exploration.
- Integrated GitHub Copilot and agentic AI workflows into development; built and used internal AI-assisted approaches to identify and remove deprecated feature flags, improving maintainability and engineering velocity.
- Collaborated with product, QA, and engineering teams to deliver releases under tight deadlines while maintaining high quality standards.

TherapyNotes — Horsham, PA

Nov 2022 – Jan 2025

Senior Software Developer

- Led development of an AI microservice using Azure OpenAI, including features such as an intake form summarizer and insurance issue predictor to improve clinical efficiency.
- Mentored developers and conducted code reviews to uphold architectural consistency, clean coding standards, and engineering best practices.

Comcept — Seminole, FL

Nov 2019 – Nov 2022

Software Developer

- Upgraded a legacy Angular 5 application to Angular 12, introducing modular components, reusable architecture, and improved user experience.
- Refactored React 17 projects by replacing Redux with Hooks to simplify state management and improve maintainability and performance.
- Maintained and optimized SQL Server stored procedures supporting critical backend workflows and data operations.

Mezrah Consulting — Tampa, FL

Jan 2019 – Sep 2019

Database Administrator

- Migrated on-prem SQL Server instances to AWS, improving reliability and disaster recovery readiness.
- Automated database maintenance and reporting tasks to reduce operational overhead.

Gracepoint Wellness — Tampa, FL

Dec 2015 – Dec 2018

Software Support Specialist

- Managed internal web applications and intranet systems while resolving technical issues across departments.
- Built lightweight .NET tools to improve workflow automation and data accuracy.
