

SENIOR .NET ENGINEER

Tampa, FL
(813) 422-4627

rickpsayland@gmail.com
github.com/RickSayland
linkedin.com/in/rick-sayland

Languages & Frameworks

C#, .NET 8 / .NET Core, ASP.NET, Web API,
JavaScript, TypeScript, React, Angular,
HTML/CSS

Data & Services

SQL Server, T-SQL, Stored Procedures, Entity Framework, REST APIs, Microservices

Cloud & DevOps

Azure, Azure OpenAI, Azure DevOps, AWS,
CI/CD, Git, Docker

Practices

GitHub Copilot, Claude Code, Claude Desktop, Claude Projects, Artifacts, Routines, Agentic AI, Unit & Integration Testing, Clean Architecture, Agile/Scrum, Code Reviews, Mentorship

B.S. Physics

Pennsylvania State University
Aug 2016

JLPT N5

Spanish, Japanese

Distance running, endurance training

Senior .NET Engineer with 10 years of experience designing and delivering enterprise applications using C#, .NET Core, ASP.NET, SQL Server, and modern JavaScript frameworks. Skilled in modernizing legacy systems, building scalable APIs, and improving performance across critical business workflows. Strong background in AI-assisted development, including GitHub Copilot, Claude Code, Claude Desktop, Claude Projects, artifacts, routines, and agentic AI workflows. Experience integrating LLM-powered capabilities into production software and using AI tools to accelerate development, automate repetitive work, and improve maintainability. Known for clean architecture, collaborative delivery, and pragmatic problem solving in Agile environments.

AmpliFund — Cleveland, OH

Developer III (Senior Developer)

Feb 2025 – Present

- Extended a large-scale grant management platform for government clients, improving accessibility, workflow customization, and release reliability.
- Optimized API interactions and database access patterns to improve performance, maintainability, and operational stability across core services.
- Leveraged Claude Desktop, Claude Code, Claude Projects, artifacts, and routines in daily development workflows to accelerate feature implementation, automate repetitive tasks, and support debugging and code exploration.
- Integrated GitHub Copilot and agentic AI workflows into development; built and used internal AI-assisted approaches to identify and remove deprecated feature flags, improving maintainability and engineering velocity.
- Collaborated with product, QA, and engineering teams to deliver releases under tight deadlines while maintaining high quality standards.

TherapyNotes — Horsham, PA

Senior Software Developer

Nov 2022 – Jan 2025

- Led development of an AI microservice using Azure OpenAI, including features such as an intake form summarizer and insurance issue predictor to improve clinical efficiency.
- Spearheaded a monolith-to-microservices transition, decomposing core .NET components to improve scalability, maintainability, and service boundaries.
- Mentored developers and conducted code reviews to uphold architectural consistency, clean coding standards, and engineering best practices.

Comcept — Seminole, FL

Software Developer

Nov 2019 – Nov 2022

- Upgraded a legacy Angular 5 application to Angular 12, introducing modular components, reusable architecture, and improved user experience.
- Refactored React 17 projects by replacing Redux with Hooks to simplify state management and improve maintainability and performance.
- Maintained and optimized SQL Server stored procedures supporting critical backend workflows and data operations.

Mezrah Consulting — Tampa, FL

Database Administrator

Jan 2019 – Sep 2019

- Migrated on-prem SQL Server instances to AWS, improving reliability and disaster recovery readiness.
- Automated database maintenance and reporting tasks to reduce operational overhead.

Gracepoint Wellness — Tampa, FL

Software Support Specialist

Dec 2015 - Dec 2018

- Managed internal web applications and intranet systems while resolving technical issues across departments.
- Built lightweight .NET tools to improve workflow automation and data accuracy.
